* Evaluation was completed on these dates.

Our evaluation of PartyCasino games consisted of Random Number Generator (RNG) tests, game rules review, functional tests, payable verification, Return To Player (RTP) calculation and source code review. We have found that the above PartyCasino games are fair and the casino system is reliable and resilient.

iTech Labs has also verified procedures for software integrity. This includes change control mechanisms and regular monitoring of critical modules. All major functional changes including new games that constitute major changes are independently tested and certified.
